INTERNSHIP

Deep-tech Computing – Product Development Intern   *June 2021 – Dec 2021*

- Designed the UI for their new project "Surabhi.io" .
- Evaluated challenges in last mile delivery routing and proposed solutions to these which helped the company to gain funding.
- Integrated data from backend services and databases.

PROJECTS

- E-commerce/MERN Stack
  https://sports-ecom.herokuapp.com/
  I have used MERN Stack to build this is E-commerce and heroku platform to host this website and Cloudinary to store images on cloud.
- QR code Scanner/PHP
  https://qrcode.codingnap.com/
  It is a QR code scanner and also QR code generator. We can generate the barcode for any product so that user don't have to manually type the details of our product and redirect user to the payment gateway.
- CSV to SQL Converter/Django
  https://e2m.codingnap.com/
  This is based in Django. This helps us to convert CSV file to SQL queries so that we can use SQL database easily.
- Food Recipe/React JS
  https://find-your-recipe-here.herokuapp.com/
  This is food related application. Search any food recipe with the help of any common ingredient.
